Vision:

To provide quality and evidence based educational approaches in order to enable students face emerging challenges in the profession of pharmacy

Mission:

To inculcate professional competence by providing students with the best possible curricular facilities in order to contribute to the health of local and Global communities.

ABOUT THE COLLEGE

P. Rami Reddy Memorial College of Pharmacy was established in the year 1997 by Sree Saraswathi Educational Society at Kadapa. Our college is one of the premier institute in pharmaceutical education and research in the country. Vibrant infrastructures, friendly management, supportive faculty are the sources of PRRMCP's success. The course programme and campus life aims to extract hidden talent in student community both in academics and extracurricular activities.

Students of PRRMCP are accorded a high quality of university education and the institution is fully responsive to contribute 21st century pharmacists for managing drug therapy outcomes and to meet challenges as future practitioners. Our college graduates are placed in various pharmaceutical industries & Companies in India and abroad

Objective of the programme:

Recent advances in the treatment of epilepsy, with a special focus on herapeutics and underlying causes, including status epilepticus, medication, and surgical options. Both in terms of the mechanics underlying epileptogenesis and in terms of the wider range of comorbidities associated with epilepsy, particularly depression, concepts developing towards a shift from treating seizures to managing epilepsy are examined

Topics Covered:

- Epilepsy
- Classification
- Status epilepticus
- Treatment
- Epileptogenesis

Department of Pharmacology

Objective of the programme:

The burning desire to start a business that helps humanity by addressing societal issues and meeting wants, while also allowing the entrepreneur to gain money, is the essence of entrepreneurship. Applying realistic, cutting-edge, and sustainable strategies to advance society as a whole, with a focus on the poor and marginalised, is the goal of social entrepreneurship. The discussion centred on the understanding of social problems and how to overcome to get good outcomes and how it helps to foster innovation, promote economic development, and create jobs. A successful company is likely to expand, which generates taxes, jobs, and other benefits for the area.

Topics Covered:

- Key to Success
- Social Objective
- Benefits
- Improving Society
- New Social Enterprises

Venue:
Seminar Hall,
P.R.R.M College of Pharmacy.

Objective of the programme:

In the fields of medicine, biotechnology and pharmacology, drug discovery is the process by which new candidate medications are discovered. Historically, drugs were discovered by identifying the active ingredient from traditional remedies or by serendipitous discovery, as with penicillin. More recently, chemical libraries of synthetic small molecules, natural products or extracts were screened in intact cells or whole organisms to identify substances that had a desirable therapeutic effect in a process known as classical pharmacology. After sequencing of the human genome allowed rapid cloning and synthesis of large quantities of purified proteins, it has become common practice to use high throughput screening of large compounds libraries against isolated biological targets which are hypothesized to be disease-modifying in a process known as reverse pharmacology. Hits from these screens are then tested in cells and then in animals for efficacy

Topics Covered:

- Technologies and Strategies to Enable Drug Discovery.
- In silico Methods and Artificial Intelligence for Drug Discovery
- Anti-inflammatory and Immunomodulating Agents.

Programme Report

Programme Name	A Seminar on current research in drug discovery
Resource Person	Dr.J.Masthanalah, M.Pharm, Ph.D. Associate Professor, Balaji College of Pharmacy, Ananthapuramu, Andhra Pradesh Mobile: 766007206 Email Id:masthpharma@gmail.com
Date of Activity	10/01/2019
Organized By	P.Rami Reddy Memorial college of Pharmacy
Venue	Seminar Hall-PRRMCP

Objective of the programme

In the fields of medicine, biotechnology and pharmacology, drug discovery is the process by which new candidate medications are discovered. Historically, drugs were discovered by identifying the active ingredient from traditional remedies or by serendipitous discovery, as with penicillin. More recently, chemical libraries of synthetic small molecules, natural products or extracts were screened in intact cells or whole organisms to identify substances that had a desirable therapeutic effect in a process known as classical pharmacology. After sequencing of the human genome allowed rapid cloning and synthesis of large quantities of purified proteins, it has become common practice to use high throughput screening of large compounds libraries against isolated biological targets which are hypothesized to be disease-modifying in a process known as reverse pharmacology. Hits from these screens are then tested in cells and then in animals for efficacy

Topics Covered

- ✓ Technologies and Strategies to Enable Drug Discovery.
- ✓ In silico Methods and Artificial Intelligence for Drug Discovery
- ✓ Anti-inflammatory and Immunomodulating Agents.
- ✓ Cardiovascular and Hematologic Drugs

P. RAMI REDDY MEMORIAL COLLEGE OF PHARMACY

44/35-1, Prakruthi Nagar, Utukur, Kadapa – 516 003 A.P.

Approved by AICTE & PCI, New Delhi, Recognised by Govt. of A.P.

Affiliated to JNTUA, Ananthapuramu.

On January 10, 2019, Dr. J. Masthanaiah spoke about the development of new pharmaceuticals.

Outcome of the Programme

Drug development involves generating progressively larger medicine batch sizes, and changes in processes for different-sized batches may cause unexpected difficulties. Use of the right pharmaceutical equipment can be helpful, as well as the discovery of parameters that affect critical process parameters (CPPs). New drug development is a highly regulated, complicated process that requires specialists and intense research and development skill sets in the medical research community. All regulations and safety indications must be observed carefully, and human and animal clinical trials subjects treated professionally and with the utmost care. The goal of drug development is to prevent human and animal pain and suffering whenever possible and find and provide new drugs that we can depend on to improve our health and happiness.

Vision:

To provide quality and evidence based educational approaches in order to enable students face emerging challenges in the profession of pharmacy

Mission:

To inculcate professional competence by providing students with the best possible curricular facilities in order to contribute to the health of local and Global communities.

ABOUT THE COLLEGE

P. Rami Reddy Memorial College of Pharmacy was established in the year 1997 by Sree Saraswathi Educational Society at Kadapa. Our college is one of the premier institute in pharmaceutical education and research in the country. Vibrant infrastructures, friendly management, supportive faculty are the sources of PRRMCP's success. The course programme and campus life aims to extract hidden talent in student community both in academics and extracurricular activities.

Students of PRRMCP are accorded a high quality of university education and the institution is fully responsive to contribute 21st century pharmacists for managing drug therapy outcomes and to meet challenges as future practitioners. Our college graduates are placed in various pharmaceutical industries & Companies in India and abroad

**Venue:
Seminar Hall,
P.R.R.M College of Pharmacy.**

Objective of the programme:

A medication administration route is often classified by the location at which the drug is applied, such as oral or intravenous. The choice of routes in which the medications are applied depends not only on convenience but also on the drug's properties and pharmacokinetics. Therefore, it is crucial to understand the characteristics of the various routes and associated techniques. Many inter professional healthcare team members are involved in administering medications to patients. Each medication administration route has unique contraindications, and the healthcare team members need to recognize them. This activity describes medication administration routes and explains the inter professional team's role in improving care for patients who undergo medication administration.

Topics Covered:

- Outline the routes of medication administration.
- Identify the most common adverse events associated with routes of medication administration.
- Describe the importance of routes of medication administration.
- Review how interprofessional strategies between healthcare teammembers can improve factors related to medication route selection
- to improve pharmaceutical outcomes in patients.

Objective of the programme:

Medicinal chemistry deals with the design, optimization and development of chemical compounds for use as drugs. It is inherently a multidisciplinary topic beginning with the synthesis of potential drugs followed by studies investigating their interactions with biological targets to understand the medicinal effects of the drug, its metabolism and side-effects.

Topics Covered:

- Inflammation.
- Cell death/survival.
- In silico drug design.
- Exploratoryprotease targets.
- Infectious diseases.
- Technology development

ABOUT THE COLLEGE

P. Rami Reddy Memorial College of Pharmacy was established in the year 1997 by Sree Saraswathi Educational Society at Kadapa. Our college is one of the premier institute in pharmaceutical education and research in the country. Vibrant infrastructures, friendly management, supportive faculty are the sources of PRRMCP's success. The course programme and campus life aims to extract hidden talent in student community both in academics and extracurricular activities.

Students of PRRMCP are accorded a high quality of university education and the institution is fully responsive to contribute 21st century pharmacists for achieving drug therapy outcomes and to emerge as future practitioners. Our college graduates are placed in various pharmaceutical industries & organizations in India and abroad

Convenor

**Dr. K. Ravindra Reddy, Ph.D.
Professor & Principal**

Programme Coordinator

**Dr.C.Rajaram, M.Pharm, Ph.D
Professor
Department of Pharmacology**

Objective of the programme:

Scientists and practitioners in the domains of radioisotope production and radiopharmaceuticals will have an international forum to discuss the latest developments in their fields at the Seminar on Emerging Trends and Practices in Radio Pharmaceutical Research. Diagnostic, therapeutic, and theranostic radioisotopes and radiopharmaceuticals, as well as regulatory and licencing concerns associated with their manufacturing, will all be discussed at the Symposium. Methods of instruction, accreditation, and certification will also be discussed.

Topics Covered:

- Production of PET- and SPECT-based diagnostic, therapeutic and theranostic medical radioisotopes
- Production of radionuclide generators
- Production of PET- and SPECT-based diagnostic, therapeutic and theranostic radiopharmaceuticals
- Radiopharmacy Chapter in Pharmacopoeias

Programme Report

Programme Name	A Seminar on Emerging Trends and Practices in Radio Pharmaceutical Research
Resource Person	Mr. S.Firoz Khan, M.Pharm., Associate Professor, Srivenkateswara College of Pharmacy, Chittoor, Andhra Pradesh Mobile: 9703573686, Email Id:fairoz.kalluru@gmail.com
Date of Activity	27/10/2018
Organized By	P.Rami Reddy Memorial college of Pharmacy
Venue	Seminar Hall-PRRMCP

Objective of the programme

Scientists and practitioners in the domains of radioisotope production and radiopharmaceuticals will have an international forum to discuss the latest developments in their fields at the national Symposium on Emerging Trends and Practices in Radio Pharmaceutical Research NSTR-2018. Diagnostic, therapeutic, and theranostic radioisotopes and radiopharmaceuticals, as well as regulatory and licencing concerns associated with their manufacturing, will all be discussed at the Symposium. Methods of instruction, accreditation, and certification will also be discussed.

Topics Covered

- ❖ Production of PET- and SPECT-based diagnostic, therapeutic and theranostic medical radioisotopes
- ❖ Production of radionuclide generators
- ❖ Production of PET- and SPECT-based diagnostic, therapeutic and theranostic radiopharmaceuticals

P. RAMI REDDY MEMORIAL COLLEGE OF PHARMACY

Approved by AICTE & PCI, New Delhi, Recognised by Govt. of A.P.

Affiliated to JNTUA, Ananthapuramu.

- ❖ Research and Development related to the production of medical radioisotopes and radiopharmaceuticals
- ❖ Quality control and quality assurance of medical radioisotopes and radiopharmaceuticals
- ❖ Pre-clinical evaluation of radiopharmaceuticals
- ❖ Good Manufacturing Practices for production of medical radioisotopes and radiopharmaceuticals
- ❖ Design of radiopharmacy (industrial, hospital and centralized) facilities
- ❖ Health regulatory aspects related to the production of radiopharmaceuticals
- ❖ Radiopharmacy Chapter in Pharmacopoeias
- ❖ Education, including e-learning, certification and training methodologies for professionals involved in radiopharmacy.

P. RAMI REDDY MEMORIAL COLLEGE OF PHARMACY

44/35-1, Prakruthi Nagar, Utukur, Kadapa - 516 003 A.P.

Approved by AICTE & PCI, New Delhi, Recognised by Govt. of A.P.

Affiliated to JNTUA, Ananthapuramu.

On 27/10/2018, Mr.S.Firoz Khan spoke about the development of Radio Pharmaceutical Research

Outcome of the Programme

Radiopharmaceuticals are radioactive compounds which have a bound radionuclide in their structure. It is used to direct the radionuclide to a location to be treated or to obtain images. Nuclear medicine is the science that in the charge of employing radiopharmaceuticals, which is very useful support for medicine assisting in several diagnoses and treatments for cancer. The main aim of this work is to shed lights on the main radionuclides and metal complexes which are used as radiopharmaceuticals.

A Seminar on Intellectual Property Rights

14/09/2018

ORGANIZED BY
P. RAMI REDDY MEMORIAL
COLLEGE OF PHARMACY
UTUKUR, KADAPA - 516 003,
A.P.

(Approved by PCI and AICTE New Delhi,
recognized by Govt of A.P. Affiliated to JNTUA
Ananthapuramu)

Objective of the programme

Intellectual property rights (IPR) have been defined as ideas, inventions, and creative expressions based on which there is a public willingness to bestow the status of property. IPR provide certain exclusive rights to the inventors or creators of that property, in order to enable them to reap commercial benefits from their creative efforts or reputation. There are several types of intellectual property protection like patent, copyright, trademark, etc. Patent is a recognition for an invention, which satisfies the criteria of global novelty, non-obviousness, and industrial application. IPR is prerequisite for better identification, planning, commercialization, rendering, and thereby protection of invention or creativity. Each industry should evolve its own IPR policies, management style, strategies, and so on depending on its area of specialty. Pharmaceutical industry currently has an evolving IPR strategy requiring a better focus and approach in the coming era.

15/09/2018

In her talk on September 14th, 2018, Mrs.P.Anitha discussed IP rights.

Outcome of the Programme

It is obvious that management of IP and IPR is a multidimensional task and calls for many different actions and strategies which need to be aligned with national laws and international treaties and practices. It is no longer driven purely by a national perspective. IP and its associated rights are seriously influenced by the market needs, market response, cost involved in translating IP into commercial venture and so on. In other words, trade and commerce considerations are important in the management of IPR. Different forms of IPR demand different treatment, handling, planning, and strategies and engagement of persons with different domain knowledge such as science, engineering, medicines, law, finance, marketing, and economics. Each industry should evolve

its own IP policies, management style, strategies, etc. depending on its area of specialty. Pharmaceutical industry currently has an evolving IP strategy. Since there exists the increased possibility that some IPR are invalid, antitrust law, therefore, needs to step in to ensure that invalid rights are not being unlawfully asserted to establish and maintain illegitimate, albeit limited, monopolies within the pharmaceutical industry. Still many things remain to be resolved in this context.

Objective of the programme:

Entrepreneurship plays a significant role in pharmaceutical marketing, just as it does in other industries. In the context of the pharmaceutical sector, entrepreneurship involves identifying and pursuing innovative opportunities to create, market, and distribute pharmaceutical products. Here are some key ways in which entrepreneurship impacts pharmaceutical marketing

Topics Covered:

- Importance of Pharmaceutical marketing
- Innovation and Product Development
- Marketing orientation in pharmaceutical industry
- Market Entry Strategies
- Relationship Building

Circular

Our college will be hosting "A one-day Seminar on Clinical Research Methodological tools" for Sixth-year Pharm.D. students on 12/07/2018. All interested students must submit their names and contact information to the coordinator shown below on or before 11/07/2018. Therefore, it is imperative that all students make the most of this opportunity by consistently turning up to class.

Venue: PRRM Seminar Hall

Time: 10.00 Am

Programme Co-ordinator: Dr.C.Rajaram, M.Pharm, Ph.D

Professor

Department of pharmacology

Vision:

To provide quality and evidence based educational approaches in order to enable students face emerging challenges in the profession of pharmacy

Mission:

To inculcate professional competence by providing students with the best possible curricular facilities in order to contribute to the health of local and Global communities.

ABOUT THE COLLEGE

P. Rami Reddy Memorial College of Pharmacy was established in the year 1997 by Sree Saraswathi Educational Society at Kadapa. Our college is one of the premier institute in pharmaceutical education and research in the country. Vibrant infrastructures, friendly management, supportive faculty are the sources of PRRMCP's success. The course programme and campus life aims to extract hidden talent in student community both in academics and extracurricular activities.

Students of PRRMCP are accorded a high quality of university education and the institution is fully responsive to contribute 21st century pharmacists for managing drug therapy outcomes and to meet challenges as future practitioners. Our college graduates are placed in various pharmaceutical industries & Companies in India and abroad

**Venue:
Seminar Hall,
P.R.R.M College of Pharmacy.**

Objective of the programme:

A clinical research requires a systematic approach with diligent planning, execution and sampling in order to obtain reliable and validated results, as well as an understanding of each research methodology is essential for researchers. Indeed, selecting an inappropriate study type, an error that cannot be corrected after the beginning of a study, results in flawed methodology. The results of clinical research studies enhance the repertoire of knowledge regarding a disease pathogenicity, an existing or newly discovered medication, surgical or diagnostic procedure or medical device. Medical research can be divided into primary and secondary research, where primary research involves conducting studies and collecting raw data, which is then analyzed and evaluated in secondary research. The successful deployment of clinical research methodology depends upon several factors. These include the type of study, the objectives, the population, study design, methodology/techniques and the sampling and statistical procedures used. Among the different types of clinical studies, we can recognize descriptive or analytical studies, which can be further categorized in observational and experimental. Finally, also pre-clinical studies are of outmost importance, representing the steppingstone of clinical trials. It is therefore important to understand the types of method for clinical research. Thus, this review focused on various aspects of the methodology and describes the crucial steps of the conceptual and executive stages

Topics Covered:

- Authoritarianism;
- Mysticism;
- Rationalism and empiricism;
- Pragmatism;
- Scepticism.

On 12/07/2018, Dr. K. Soma Sekhar Reddy Delivered speech on Clinical Research Methodological tools.

Outcome of the Programme

Rationalism and empiricism, pragmatism and scepticism may be within the scope of the scientific method, whereas authoritarianism and mysticism are clearly pseudoscience or anti-science. Science is characterized by systematic observation and experimentation, inductive and deductive reasoning, and the formation and testing of hypotheses and theories. The details of how these are carried out can vary greatly, but these characteristics are sufficient to distinguish scientific activity from non-science
