

P. RAMI REDDY MEMORIAL COLLEGE OF PHARMACY

44/35-1, Prakruthi Nagar, Utukur, Kadapa – 516 003 A.P.

Approved by AICTE & PCI, New Delhi, Recognized by Govt. of A.P.

Affiliated to JNTUA, Ananthapuramu, Recognized U/S 2(f) & 12(B) of UGC Act, 1956.

POLICY ON ENVIRONMENT AND ENERGY UTILIZATION

P. Rami Reddy Memorial College of Pharmacy leaves behind a clean and eco-friendly campus, where eco-friendly teaching and activities work together to teach people how to act in a way that is good for the earth and sustainable. The Green Campus idea lets the school take the lead in reviving environmental culture by promoting environmental ideas among students and staff. The Institute also encourages students and staff to accept, use, and support practices that are good for the environment, both for themselves and for the world around them. The growing impact of humans on the world is causing major environmental problems that will only get worse over time. It will take a lot of work to make up for the damage that humans do to the environment, which in turn changes how we deal with the world and with each other. To make real change, all problem-solving methods must be used.

Goals

- ✓ Inspire students to keep their campus clean and green
- ✓ Instruct pupils in order to raise public consciousness.
- ✓ To impress upon students the significance of environmental protection and the problems it faces.
- ✓ All employees, students, and visitors must abide by this environmental and energy policy in all their interactions with the University. As a result, we will be better able to minimize our consumption of, and impact on, the environment.
- ✓ To evaluate the ecological effects of our current energy consumption.
- ✓ Set up solar panels to produce renewable energy.
- ✓ Turn off your monitor when you leave your table. Shut down instead of logging out if at all possible.
- ✓ Let natural light in by turning off extra lights.

Approved by AICTE & PCI, New Delhi, Recognized by Govt. of A.P.

Affiliated to JNTUA, Ananthapuramu, Recognized U/S 2(f) & 12(B) of UGC Act, 1956.

- ✓ Replace incandescent lights with CFLs or LEDs whenever possible.
- ✓ When a meeting, lesson, or lecture is over, please turn off the lights and fans. Don't bother with any fancy lighting effects.
- ✓ Only turn on the fans when absolutely necessary.
- ✓ Water heaters in hostels are typically powered by renewable energy sources.
- ✓ Use public transport, and pedestrian-friendly roadways, we want to decrease local air pollution emissions and launch a tree-planting programme.
- ✓ To promote the adoption of cutting-edge technologies for the reduction of carbon footprints, air pollution, and noise pollution.

The Institute uses the three R's (Reduce, Recycle, and Reuse) to deal with waste:

Reduce, Recycle, and Reuse. Here are some examples of projects:

- i. Turn on the power management tools on your computer and monitor so that when you're not using them, they go into a low-power "sleep" mode.
- ii. When you leave your table, turn off your screen.
- iii. Turn on your laser printer's power management tools.
- iv. If you can, shut down instead of signing off.
- v. Turn off lights you don't need and let the sun shine in instead.
- vi. Don't use lights for decoration.
- vii. Use LED or compact fluorescent lamps.
- viii. Turn off the lights when you're not in a meeting room, classroom, or lecture hall.
- ix. Only use the fans when you need to.
- x. Renewable energy
- xi. Solar power is the cleanest and most plentiful source of green energy. Solar energy is pushed by the Institute, and stakeholders are encouraged to support and use renewable energy.

xii. Pathways that are good for walking:

xiii. There is enough room on campus for staff and students to park their cars. The roads on campus are in good shape. People walking on foot can do so safely on the paths.

xiv. Waste management
