P.RAMI REDDY MEMORIAL  
COLLEGE OF PHARMACY  
Utukur, Kadapa - 516 003 A.P.

## ABOUT THE COLLEGE

P. Rami Reddy Memorial College of Pharmacy was established in the year 1997 by Sree Saraswathi Educational Society at Kadapa. Our college is one of the premier institute in pharmaceutical education and research in the country. To encourage the talent from the rural areas we started the first pharmacy college as P. Rami Reddy Memorial College of Pharmacy in Rayalaseema region of Andhra Pradesh.

The B.Pharmacy course was started in the year 1997 with 60 admissions and raised the intake to 100 in 2014. Pharm.D and Pharm.D (PB) courses were introduced in the year 2008 and 2009 respectively. The M.Pharmacy course was started with Pharmacology (2010), Pharmaceutics (2010), Pharmaceutical Analysis (2011) and Pharmacognosy (2011).

## VISION

To provide quality and evidence based educational approaches in order to enable students face emerging challenges in the profession of pharmacy.

## MISSION

To inculcate professional competence by providing students with the best possible curricular facilities in order to contribute to the health of local and Global communities.

## ABOUT FACULTY DEVELOPMENT PROGRAM

An FDP on Artificial Intelligence (AI) - Based Pharmacovigilance Detecting Adverse Drug Reactions is a training program for faculty members, researchers, to learn about the latest advances in using AI to detect adverse drug reactions (ADRs).

The benefits of attending this FDP is to

- Learn about the latest advances in using AI to detect ADRs
- Gain hands-on experience with AI-based pharmacovigilance tools
- Network with other experts in the field and learn from their experiences
- Develop the skills and knowledge necessary to conduct research or teach on AI-based pharmacovigilance

## PROGRAMME REPORT

**Name of the Programme:** A Five days Faculty Development Program on “A Five days Faculty Development Program on Artificial Intelligence (AI) - Based Pharmacovigilance Detecting Adverse Drug Reactions”.

**Date:** 01.03.2023 to 05.03.2023

### **Objectives of the Programme:**

P.Rami Reddy Memorial College of Pharmacy had successfully organized A Five days Faculty Development Program on “**Artificial Intelligence (AI) - Based Pharmacovigilance Detecting Adverse Drug Reactions**” in association with Sree Saraswathi Educational Society. The main objective of the FDP Artificial Intelligence (AI) - Based Pharmacovigilance Detecting Adverse Drug Reactions is to use AI to identify and monitor adverse drug reactions (ADRs) more effectively than traditional methods.

### **Topics Covered:**

- Introduction to AI and machine learning.
- Data mining techniques for pharmacovigilance.
- Applications of AI in pharmacovigilance.
- Challenges and opportunities of AI in pharmacovigilance.
- Case studies with real-world examples of how AI has been used in pharmacovigilance.

**Outcome of the Programme:** An open feedback was collected from the faculty members and they convey that the program was extremely helpful for covering the topics about the importance of Artificial Intelligence (AI) in Pharmacovigilance for detecting adverse drug reactions. Overall, the programme can be a valuable asset for participants who want to pursue a career in AI in pharmacovigilance. The program will provide participants with the knowledge, skills, and understanding they need to succeed in this field.

### **ABOUT FACULTY DEVELOPMENT PROGRAM**

The scope of the Faculty Development Programme is to cover all stages of the innovation & entrepreneurship continuum, in accordance with the existing National Innovation and Start-up Policies potentially in view of the prevailing therapeutic/clinical needs in the pharmaceutical sector. The scope of the FDP is to promote, educate and support staff members for potential careers at the convergence of basic and translational research, cutting-edge therapeutic delivery, science and emerging medical device technologies. Further, this will foster the development of career paths that incorporate new analytical or technological tools, including medical devices for staff members.

## PROGRAMME REPORT

**Name of the Programme:** A One day training program on “Tools for digital transformation effective team building”.

**Program Date:** 17.12.2022

### **Objectives of the Programme:**

P.Rami Reddy Memorial College of Pharmacy had successfully organized A One day training programme on “**Tools for digital transformation effective team building**” in association with Sree Saraswathi Educational Society. The main objective of the program is to help participants understand how to use digital transformation tools to improve the organization's performance and achieve its goals. To help participants develop the skills and knowledge they need to build and lead effective teams in the digital age.

### **Topics Covered:**

- Microsoft Office
- Word
- Excel
- PowerPoint
- Outlook
- OneNote
- Publisher
- Cloud computing
- Artificial intelligence and machine learning

### **Outcome of the Programme:**

The outcomes of a Tools for digital transformation effective team building training program was to introduce the latest tools and technologies that can be used to improve the organization's performance and achieve its goals. Overall, a training program on tools for digital transformation and effective team building was a valuable investment for both individual staff and organization. It helped participants develop the skills and knowledge they need to succeed in the digital age and achieve their personal and professional goals.

## PROGRAMME REPORT

**Name of the Programme:** A Five days Faculty Development Program on "Artificial Intelligence in Healthcare System: An Advanced Data Mining Tools"

**Date:** 09.02.2022 to 14.02.2022

### **Objectives of the Programme:**

P.Rami Reddy Memorial College of Pharmacy had successfully organized A 6 days Faculty Development Program on "**Artificial Intelligence in Healthcare System: An Advanced Data Mining Tools**" in association with Sree Saraswathi Educational Society. The objective of the program is to create awareness on artificial intelligence (AI) in healthcare system to improve the quality, efficiency, and accessibility of healthcare.

### **Topics Covered:**

- Introduction to AI and machine learning.
- Data mining techniques for healthcare.
- Applications of AI in healthcare, such as:
  - ✓ Disease diagnosis and prognosis
  - ✓ Personalized treatment planning
  - ✓ Drug discovery
  - ✓ Real-time monitoring and feedback
  - ✓ Administrative tasks automation
- Ethical and legal considerations of AI in healthcare.
- Challenges and future directions of AI in healthcare.

**Outcome of the Programme:** The program helped faculty members to collaborate and work together more effectively. An open feedback was collected from the faculty members and they feel more motivated and confident in their teaching with an opportunity to collaborate with other faculty members. The program was extremely helpful to acquire knowledge and understanding of AI and machine learning, skill in data mining and analysis. Provide the ability to communicate effectively about AI in healthcare and create awareness of the ethical and legal considerations of AI in healthcare.

## Vision

To provide quality and evidence based educational approaches in order to enable students face emerging challenges in the profession of pharmacy

## Mission

To inculcate professional competence by providing students with the best possible curricular facilities in order to contribute to the health of local and Global communities.

## ABOUT THE COLLEGE

P. Rami Reddy Memorial College of Pharmacy was established in the year 1997 by Sree Saraswathi Educational Society at Kadapa. Our college is one of the premier institute in pharmaceutical education and research in the country.

To encourage the talent from the rural areas we started the first pharmacy college as P. Rami Reddy Memorial College of Pharmacy in Rayalaseema region of Andhra Pradesh.

The B.Pharmacy course was started in the year 1997 with 60 admissions and raised the intake to 100 in 2014. Pharm.D and Pharm.D (PB) courses were introduced in the year 2008 and 2009 respectively. The M.Pharmacy course was started with Pharmacology (2010), Pharmaceutics (2010), Pharmaceutical Analysis (2011) and Pharmacognosy (2011).

## ABOUT FACULTY DEVELOPMENT PROGRAM

The scope of the Faculty Development Programme is to cover all stages of the innovation & entrepreneurship continuum, in accordance with the existing National Innovation and Start-up Policies potentially in view of the prevailing therapeutic/clinical needs in the pharmaceutical sector. The scope of the FDP is to promote, educate and support faculty members for potential careers at the convergence of basic and translational research, cutting-edge therapeutic delivery, science and emerging medical device technologies. Further, this will foster the development of career paths that incorporate new analytical or technological tools, including medical devices for faculty members.

### CERTIFICATE ELIGIBILITY

Certificate will be provided to all participants who actively participate on all days of the FDP.

### OBJECTIVES OF THE FDP

Continuous advancements in chromatographic techniques. Reversed-phase liquid chromatography (RPLC) as the gold standard for pharmaceutical analysis.

Ultra-high performance liquid chromatography (UHPLC) updated technique.

### WHO SHOULD ATTEND

The FDP is open for the Faculty members, Research Scholars and Industrialists to enhance the quality of research in Pharmaceutical and interdisciplinary subject areas.

REGISTRATION  
FREE Registration.

### ABOUT THE DEPARTMENT

The Department of Pharmaceutical Analysis has emerged as one of the premier science departments of P.Rami Reddy Memorial College of Pharmacy. The Department is uniquely blessed with a rich legacy, highly dedicated and inspiring faculty, talented researchers and helpful supporting staff. The instrumental facilities like UV-Vis Spectrophotometer, HPLC with PDA detector, FT-IR, Flame Photometer, Spectrofluorimeter, Nephelometer, turbidimeter, Karl Fisher Auto Titrator, Electrophoresis, Conductometer and high-end computational facility like servers and softwares.

## PROGRAMME REPORT

**Name of the Programme:** A Five days Faculty Development Program on "Technological Advancements in Chromatography: instrumentation and application"

**Date:** 04.10.2021 to 08.10.2021

### **Objectives of the Programme:**

P.Rami Reddy Memorial College of Pharmacy had successfully organized A six days Faculty Development Program on "Technological Advancements in Chromatography: instrumentation and application" in association with Sree Saraswathi Educational Society. The main objective of the program is to ignite the research interest among the faculties through expert opinions in the area of Chromatographic techniques. Technological advancements in chromatographic techniques including liquid chromatography with ultraviolet detection (LC-UV), liquid chromatography with mass spectroscopy (LC-MS), liquid chromatography with high-resolution mass spectroscopy (LC-HRMS) and ultra-high performance liquid chromatography (UHPLC) techniques.

### **Topics Covered:**

- Continuous advancements in chromatographic techniques.
- Reversed-phase liquid chromatography (RPLC) as the gold standard for pharmaceutical analysis.
- Ultra-high performance liquid chromatography (UHPLC) updated technique allows for higher efficiency and increased throughput than traditional chromatography methods.
- Wide use of LC-MS method for analyzing metabolomics.

**Outcome of the Programme:** An open feedback was collected from the faculty members and the programme was very beneficial for covering the topics related to the knowledge that is useful for the research work and updating of their knowledge. The participants acquired the knowledge regarding advanced chromatographic techniques like liquid chromatography with mass spectroscopy (LC-MS), liquid chromatography with high-resolution mass spectroscopy (LC-HRMS) and ultra-high performance liquid chromatography (UHPLC) techniques. They enriched the knowledge on the innovative chromatographic columns for the analysis of protein biopharmaceuticals and chiral drugs and detecting genotoxic impurities with the help of Hydrophilic Interaction Chromatography (HILIC), and immobilized polysaccharide chiral stationary phases.

## PROGRAMME REPORT

**Name of the Programme:** A One day training programme on “Communication Skills and Personality Development”.

**Date:** 18.12.2021

### **Objectives of the Programme:**

P.Rami Reddy Memorial College of Pharmacy had successfully organized A One day training programme on “**Communication Skills and Personality Development**” in association with Sree Saraswathi Educational Society. The main objective of the program is to help the non-teaching staff to improve the communication skills and personality development with the help of number of resources.

### **Outcome of the Programme:**

The outcome of a Communication Skills and Personality Development training program was very positive. Participants experienced improved communication skills, increased self-confidence, enhanced self-awareness, improved interpersonal skills, and greater career success. Communication skills and personality development programs may help participants to better understand themselves and their strengths and weaknesses. This can lead to more effective self-management and decision-making. Participants learned how to interact with others in a more positive and professional manner. This can lead to stronger relationships with colleagues, friends, and family members.

## Objectives of the FDP

The objectives of control of COVID-19 by adopting Indian herbal medicine are to:

- Prevent the spread of the virus
- Treat COVID-19 patients
- Improve the quality of life of COVID-19 patients
- Reduce the risk of reinfection

## Who should Attend

The FDP is open for the Faculty members, Research Scholars and Industrialists to enhance the quality of research in Pharmaceutical and interdisciplinary subject areas.

**REGISTRATION**  
**FREE Registration**

**CERTIFICATE ELIGIBILITY**  
Certificate will be provided to all participants who actively participate on all days of the FDP

## ABOUT FACULTY DEVELOPMENT PROGRAM

The scope of the Faculty Development Programme is to cover the following topics:

- The history and use of Indian herbal medicine
- The scientific evidence for the effectiveness of Indian herbal medicine against COVID-19
- The safety of Indian herbal medicine
- How to teach about Indian herbal medicine to students
- The challenges of teaching about Indian herbal medicine

The benefits of attending this FDP make participants to Gain the knowledge and skills you need to teach about Indian herbal medicine to control COVID-19. Learn from experts in the field of Indian herbal medicine. Networking with other teachers who are interested in teaching about Indian herbal medicine. Getting support and advice on how to implement teaching about Indian herbal medicine in their own classroom

## PROGRAMME REPORT

**Name of the Programme:** A Five days Faculty Development Program on “Control of covid-19 by adoption of Indian herbal medicine.”

**Date:** 15.02.2021 to 19.02.2021

### **Objectives of the Programme:**

P.Rami Reddy Memorial College of Pharmacy had successfully organized A Five days Faculty Development Program on “recent development of nano medicine with targated natural products’ in association with Sree Saraswathi Educational Society. The main objective of the program is COVID-19, Herbal medicine, Narrative review, Ethiopia. Severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) is the cause pandemic of coronavirus disease 2019 (COVID-19). The aim of this review is to present main herbal products, their source, characteristics, and potential antiviral actions concerning COVID-19. Some of the antiviral medicinal plant species are *citrus Spp.*, *orange (C. Sinensis)*, *Allium sativum*, *Allium cepa*, *Mentha piperita*, and *nigella sativa* are the most desirable herbal drink or fruit that can introduce effective adjuvant components in COVID-19 management

### **Topics Covered:**

- Introduction to covid-19
- Current prevention of covid-19
- Treatment of mild infection of COVID-19
- Treatment of severe infection of COVID-19
- Some herbal medicines used in covid-19  
*Malva sylvestris*L.  
*Aloe barbadensis*Mill.  
*Salvia officinalis*L.
- **Outcome of the Programme:** This FDP control of covid-19 natural products. An antiviral drug that is primarily approved by WHO for emergency management was remdesivir.
- Different components of plants bio chemicals are the most desirable herbal drink or fruit that can be introduced as effective adjuvant components in COVID-19 management
- To reduce fever and cough as the most common complication of COVID-19 via their anti-inflammatory effect.
- Herbal drugs such as *G. glabra*, *Thymus vulgaris*, *Allium sativum*, *Althea officinalis*, and *ginseng* may become effective in the preventive and supportive management of COVID-19 through boosting the immune system.

## PROGRAMME REPORT

**Name of the Programme:** A Five days Faculty Development Program on “ICT Blended Learning and its tools for effective teaching”

**Date:** 12.10.2020 to 16.10.2020

### **Objectives of the Programme:**

P.Rami Reddy Memorial College of Pharmacy had successfully organized A Five days Faculty Development Program on “**ICT Blended Learning and its tools for effective teaching**” in association with Sree Saraswathi Educational Society. The main objective of the FDP is to focus on the use and importance of Blended learning in education system. After the COVID-19 pandemic there is boom in blended learning approaches so as an educator adapt and implement new ICT technologies.

### **Topics Covered:**

- Learning and Teaching methods and new techniques in blended learning.
- Digital world- Roles and responsibilities of teachers ICT enabled teaching & learning.
- Tools for Virtual classes Assessment procedures.
- To make effective presentation with Advanced techniques.
- Hybrid mode of learning to enhance the Quality of Education system

**Outcome of the Programme:** An open feedback was collected from the faculty members and they convey that the program was extremely helpful for covering the topics about the importance of the inclusion and use of Information technology in education system. Overall this FDP proved to be beneficial for the participants in every aspect.

## PROGRAMME REPORT

**Name of the Programme:** A One day training programme on “Awareness on COVID Infection”.

**Date:** 20.11.2020

### **Objectives of the Programme:**

P.Rami Reddy Memorial College of Pharmacy had successfully organized A One day training programme on “**Awareness on COVID Infection**” in association with Sree Saraswathi Educational Society. The main objective of the program is to equip participants with the knowledge and skills they need to protect themselves and others from COVID-19.

### **Topics Covered:**

- To increase knowledge of COVID-19, including its symptoms, transmission, and prevention.
- To improve understanding of the importance of social distancing, handwashing, and mask-wearing.
- To develop skills in identifying and reporting COVID-19 symptoms.
- To promote healthy behaviors that can help to reduce the risk of infection.
- To dispel common myths and misconceptions about COVID-19.

### **Outcome of the Programme:**

The outcomes of a training program on “Awareness on COVID Infection” increased knowledge of COVID-19, including its symptoms, transmission, and prevention. Improved understanding of the importance of social distancing, hand washing, and mask-wearing. Increased skills in identifying and reporting COVID-19 symptoms. Changed attitudes and behaviors that can help to reduce the risk of infection. Participants are able to correctly define COVID-19 and describe its symptoms. Participants are able to explain how COVID-19 spreads and how to prevent it. Participants are able to demonstrate proper hand washing technique. Participants are able to correctly wear a mask. Participants are able to identify COVID-19 symptoms and know what to do if they think they have the virus. Participants are more likely to practice social distancing, handwashing, and mask-wearing. Participants are less likely to believe common myths and misconceptions about COVID-19. By increasing knowledge, skills, and attitudes, the training can help to reduce the spread of the virus and save lives. Overall the training programme got the positive feedback from the participants.

## ABOUT THE COLLEGE

P. Rami Reddy Memorial College of Pharmacy was established in the year 1997 by Sree Saraswathi Educational Society at Kadapa. Our college is one of the premier institute in pharmaceutical education and research in the country. To encourage the talent from the rural areas we started the first pharmacy college as P. Rami Reddy Memorial College of Pharmacy in Rayalaseema region of Andhra Pradesh.

The B.Pharmacy course was started in the year 1997 with 60 admissions and raised the intake to 100 in 2014. Pharm.D and Pharm.D (PB) courses were introduced in the year 2008 and 2009 respectively. The M.Pharmacy course was started with Pharmacology (2010), Pharmaceutics (2010), Pharmaceutical Analysis (2011) and Pharmacognosy (2011).

Sree Saraswathi Educational Society**

### **OBJECTIVE OF THE FDP**

The main objective of the program is Nano medicine based on natural products in preclinical models of various diseases.

### **WHO SHOULD ATTEND**

The FDP is open for the Faculty members, Research Scholars and Industrialists to enhance the quality research in Pharmaceutical and interdisciplinary subject areas.

### **REGISTRATION FREE Registration**

### **CERTIFICATE ELIGIBILITY**

Certificate will be provided to all participants who actively participate on all days of the FDP.

### **ABOUT FACULTY DEVELOPMENT PROGRAM**

The scope of the Faculty Development Programme is to cover Nanoparticles used in targeted drug delivery to improve the bioavailability, biodistribution, and accumulation of therapeutics, preferentially in the targeted diseased area, acting as stability enhancers. The FDP is to promote, educate and support faculty members for potential careers at the convergence of basic and translational research, cutting-edge therapeutic delivery, science and emerging medical device technologies. Further, this will foster the development of career paths that incorporate new analytical or technological tools, including medical devices for faculty members.

## PROGRAMME REPORT

**Name of the Programme:** A Five days Faculty Development Program on “Recent development of Nano medicine with targeted natural products”.

**Date:** 02.03.2020 to 06.03.2020

### **Objectives of the Programme:**

P.Rami Reddy Memorial College of Pharmacy had successfully organized A 6 days Faculty Development Program on “Recent development of Nano medicine with targeted Natural products” in association with Sree Saraswathi Educational Society. The main objective of the program is Nano medicine based on natural products in preclinical models of various diseases. The inherent defects of natural products in physiological media such as poor solubility and stability and short biological half-life limit their clinical application.

### **Topics Covered:**

- Introduction to nano medicine with targated natural products
- Historical review of drugs derived from natural products
- Nano strategy of drugs from natural products
- Application of nano drugs derived from natural products

**Outcome of the Programme:** This FDP about nano medicine with targated natural products. Application of nanotechnology in drug delivery has had a positive impact on the treatment of a variety of human diseases used to treat cancer, Diabetes mellities, neurodegenerative disease like alzheimer’s disease, Parkinson’s disease, to treat cardio vascular disease. Nanodrugs containing paclitaxel, camptothecin, curcumin, or resveratrol have been on the market or are used in clinical research, showing very promising results. Some polysaccharide natural products show nice pharmacological activities and can be used as excellent nano carrier materials, which highlight the advantages and potential of natural products in the nano drug field

## PROGRAMME REPORT

**Name of the Programme:** A Five days Faculty Development Program on “Applications of Novel Drug Delivery System”.

**Date:** 05.08.2019 to 09.08.2019

### **Objectives of the Programme:**

P.Rami Reddy Memorial College of Pharmacy had successfully organized A Five days Faculty Development Program on “Applications of Novel Drug Delivery System” in association with Sree Saraswathi Educational Society. The main objective of the program is to provide Practical knowledge on Novel Drug Delivery Systems with an attempt to transform the newer concepts of drug delivery systems into everyday lab practice. Novel drug delivery systems are most popular nowadays, due to the fact that changes in lifestyle and changes in patient population in the emerging and developing countries has changed the concept of drug delivery systems.

### **Topics Covered:**

- Introduction to novel drug delivery system
- Recent developments in novel drug delivery system
- Properties and method of preparation of phytosome
- Properties and method of preparation of liposomes
- Properties and method of preparation of niosomes
- Properties and method of preparation of ethosomes

### **Outcome of the Programme:**

This FDP would bring experts in the above fields to showcase cutting edge technologies in the state-of-the-art of various multi-disciplinary areas using novel drug delivery system and their use with the knowledge of various challenges being faced by researchers from bringing the recent development from lab top real world adaptability. The objective of this course is to provide a platform to gather, provide clear cut ideas regarding various recent developments in enhancing of pharmacological activity, Enhancement of stability, Improving tissue macrophages distribution, and Sustained delivery, Protection from physical and chemical degradation. The program will also motivate research ideas with practical applications by the experts in this field of research.

## PROGRAMME REPORT

**Name of the Programme:** A One day training programme on “Handling of Laboratory Instruments and Equipments”.

**Date:** 05.12.2019

### **Objectives of the Programme:**

P. Rami Reddy Memorial College of Pharmacy had successfully organized A One day training programme on “**Handling of Laboratory Instruments and Equipments**” in association with Sree Saraswathi Educational Society. The main objective of the program is to improve the handling of laboratory instruments and equipments safely and with the ease to handle.

### **Topics Covered:**

- Teach participants how to safely operate and use laboratory equipment.
- Familiarize participants with the different types of laboratory equipment and their uses.
- Trained participants on the proper maintenance and care of laboratory equipment.
- Helped participants develop good safety practices in the laboratory.
- Provided participants with the knowledge and skills they need to conduct safe and effective laboratory experiments.

### **Outcome of the Programme:**

An open feedback has been collected from the participants and they satisfied with the training programme. The programme enhanced ability to troubleshoot problems with laboratory equipments. The training program included the hands-on exercise where participants have the opportunity to practice operating laboratory equipment under the supervision of an instructor. Overall the outcomes of a training program on “Handling of Laboratory Instruments and Equipments” can be significant for both the individual and the laboratory as a whole. By increasing knowledge, skills, and awareness, the training can help to prevent accidents, injuries, and environmental damage.

## ABOUT THE COLLEGE

### VISION

To provide quality and evidence based educational approaches in order to enable students face emerging challenges in the profession of pharmacy

### MISSION

To inculcate professional competence by providing students with the best possible curricular facilities in order to contribute to the health of local and Global communities.

P. Rami Reddy Memorial College of Pharmacy was established in the year 1997 by Sree Saraswathi Educational Society at Kadapa. Our college is one of the premier institute in pharmaceutical education and research in the country. To encourage the talent from the rural areas we started the first pharmacy college as P. Rami Reddy Memorial College of Pharmacy in Rayalaseema region of Andhra Pradesh.

The B.Pharmacy course was started in the year 1997 with 60 admissions and raised the intake to 100 in 2014. Pharm.D and Pharm.D (PB) courses were introduced in the year 2008 and 2009 respectively. The M.Pharmacy course was started with Pharmacology (2010), Pharmaceutics (2010), Pharmaceutical Analysis (2011) and Pharmacognosy (2011).

## ORGANIZING COMMITTEE

### CHIEF PATRON

Sri G. Eswar Reddy, Chairman,

P.RAMI REDDY MEMORIAL COLLEGE  
OF PHARMACY  
UTUKUR, KADAPA - 516 003 A.P.**

## OBJECTIVES OF THE FDP

This FDP provides a platform to learn the tools and techniques needed for the design, discovery and development of drugs. To provide the knowledge and skills needed for faculty and researchers to cater to the present day situation of drug development and enhance their learning styles.

## WHO SHOULD ATTEND

The FDP is open for the Faculty members, Research Scholars and Industrialists to enhance the quality of research in Pharmaceutical and interdisciplinary subject areas.

**REGISTRATION**  
FREE REGISTRATION.

## CERTIFICATE ELIGIBILITY

Certificate will be provided to all participants who actively participate on all days of the FDP.

## ABOUT FACULTY DEVELOPMENT PROGRAM

The scope of the Faculty Development Programme is to cover all stages of the innovation & entrepreneurship continuum, in accordance with the existing National Innovation and Start-up Policies potentially in view of the prevailing therapeutic/clinical needs in the pharmaceutical sector. The scope of the FDP is to promote, educate and support staff members for potential careers at the convergence drug discovery and development through various advanced features. Further, a wide range of computational approaches including new methodologies like In silico screening as well as practical aspects will be focused.

Date: 18.03.2019

## PROGRAMME REPORT

**Name of the Programme:** A Six days Faculty Development Program on “Role of Computer Aided Drug Design in Drug Discovery and Development”

**Date:** 11.03.2019 to 16.03.2019

### **Objectives of the Programme:**

P.Rami Reddy Memorial College of Pharmacy had successfully organized A Six days Faculty Development Program on “**Role of Computer Aided Drug Design in Drug Discovery and Development**” in association with Sree Saraswathi Educational Society. The main objective of the program is to ignite the research interest among the faculties through expert opinions in the area of drug discovery and development with the help of Computer Aided Drug Design.

This FDP provides a platform to learn the tools and techniques needed for the design, discovery and development of drugs. To provide the knowledge and skills needed for faculty and researchers to cater to the present day situation of drug development and enhance their learning styles. drug discovery and development through various advanced features. In silico screening also paves path for the synthesis and screening of selected compounds for better therapeutics. computational chemistry and computer aided drug discovery which are aimed to cover a wide range of computational approaches including new methodologies as well as practical aspects in this area.

### **Topics Covered:**

- Creating Value from Mountains of Data
- Artificial Neural Networks (ANNs)
- AI Drug-Hunting Captures Big Pharma Interest
- Intelligence in Drug Discovery by Using Different AI Models

### **Outcome of the Programme:**

An open feedback was collected from the faculty members and they convey that the program was extremely helpful for covering the topics related to the information which is useful for the research work, for the drug discovery. Artificial Intelligence will identify hit and lead molecules, allowing for faster confirmation of the drug target and drug optimization. Identifying a novel drug molecule necessitates its integration into an appropriate dosage type with the desired distribution characteristics. In what manner the Artificial Intelligence will take the place of the traditional trial-and-error process.

## OBJECTIVES OF THE FDP

The objectives of this FDP are to:

Provide participants with a comprehensive overview of the latest advances in research methodology for pharmaceutical innovation.

Equip participants with the skills

Promote the adoption of advanced research in pharmaceutical sector.

## ABOUT FACULTY DEVELOPMENT PROGRAM

By attending this FDP participants can develop the skills and knowledge necessary to:

Conduct innovative research that on addresses the unmet needs of patients and the healthcare system

Design and conduct research studies that are rigorous, scientifically sound, and ethically responsible

Use advanced research methods and tools to analyze data and generate new knowledge

Communicate their research findings to a variety of audiences, including scientists, clinicians, and policymakers

**Name of the Programme:** A Six days Faculty Development Program on "Emerging trends in Pharmacy practice"

**Date:** 16.07.2018 to 21.07.2018

#### **Objectives of the Programme:**

P.Rami Reddy Memorial College of Pharmacy had successfully organized A Six days Faculty Development Program on "**Emerging trends in Pharmacy practice**" in association with Sree Saraswathi Educational Society. The main objective of the program is to provide research scholars to enhance the quality of research in Social Sciences, Humanities, Commerce and Management and interdisciplinary subject areas. It aims to cover topics from identification of the research problem, review of literature, quantitative, qualitative, and mixed methodologies to ethical practices in writing and publication.

#### **Topics Covered:**

- Introduction about pharmacy practice
- Enhancement of quality of research in social sciences
- Enhancement of quality of research in Humanities and commerce
- Management and interdisciplinary subject programme
- Explanation about how research and publication works
- Management of research problems, review of literature, quantitative and qualitative methodologies

**Outcome of the Programme:** After this Faculty Development Programme, the participating faculty members and research scholars, irrespective of their disciplines, were aware of quantitative, qualitative, and mixed methodologies in research and publication ethics. Their theoretical understanding and practical perspectives were deepened. Among the many desired outcomes of this Faculty Development Program is the collaboration between faculty members and

### PROGRAMME REPORT

**Name of the Programme:** A One day training programme on "Fire and Safety Awareness Program".

**Date:** 15.12.2018

#### **Objectives of the Programme:**

P.Rami Reddy Memorial College of Pharmacy had successfully organized A One day training programme on "**Fire and Safety Awareness Program**" in association with Sree Saraswathi Educational Society. The main objective of the program is to increase awareness of fire hazards in the workplace such as flammable materials, electrical hazards and smoking materials. To teach employees how to prevent fires and respond to fire.

#### **Topics Covered:**

- The nature of fire
- The causes of fire
- Fire prevention measures
- Fire extinguishing procedures
- Evacuation procedures
- First aid for fire victims
- Reporting procedures

#### **Outcome of the Programme:**

The outcome of a fire and safety awareness training program was it increased awareness of fire hazards and the importance of fire prevention. Increased ability to use fire extinguishers and other fire safety equipment. It also improved the ability of the non teaching faculty members to evacuate a building safely in the event of a fire. Created a culture of safety in the workspace and overall response from the trained persons was good.
